Up to now...

The **demonstration plant** of the Project is immersed in the start-up and commissioning stage in the first of the places where it will be operating (the complex of Zonzamas, **Lanzarote**).

Last November the Project was present at **ECOMOONDO**, held in Rimini (Italy). **LIFE LEACHLESS** was able to share experiences with representatives of other European projects and stakeholders on the circular economy.

In January, LIFE LEACHLESS attended the **LIFE Waste-Water Treatment Platform Meeting**, which was held in Barcelona (Spain). Representatives of the **LIFE LEACHLESS** project participated in the thematic workshop on circular economy, gave a presentation on the project, attended a visit to a wastewater treatment plant and were able to exchange opinions with representatives of other LIFE projects in the water sector.

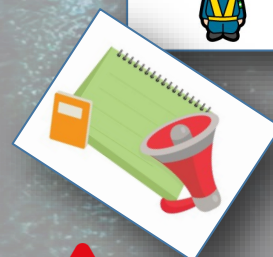

Next...

Due to the uncertainty caused by the COVID-19 outbreak, we cannot know exactly when the plant will be operating in the Zonzamas complex (Lanzarote), but we hope it will be as soon as possible.

We plan to attend several conferences, fairs, workshops and other events that serve for the dissemination of the project, as well as for networking; but all this depends on the evolution of the situation in which we are immersed today, due to the COVID-19 outbreak.

The **LIFE LEACHLESS** project team continues to work to develop the tasks in the best possible way. However, we would like to remind you that, right now, the priority is the health of everyone. So please follow the instructions of the health authorities regarding COVID-19 and **Keep safe!**

If you are a **follower**, we need you! If you belong to a facility where leachate is generated or a ceramic company, we want to know your opinion. LIFE LEACHLESS invites you to participate as an observer of the project. Please fill in the questionnaire on our website.
