Up to now...

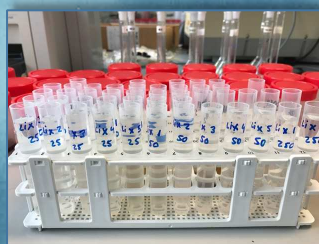

LIFE15 projects, which was organised in Brussels on the 12th and the first consortium meeting, which took place at the coordinator's premises, CARTIF Foundation, on the 21st.

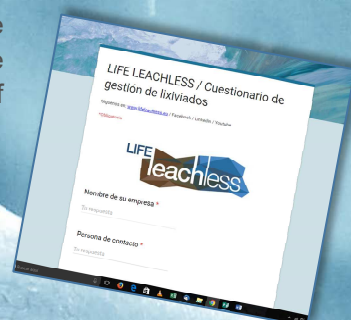

In October 2016 we launched the LIFE LEACHLESS project. Two coordination meetings took place during this month: the kick-off meeting of

During these first months, samples of leachates from 18 different sources are being characterised. The objective is to compare their composition and determine the key parameters that can influence their treatment.

Two surveys have been developed, one for leachate generating plants and the other for ceramic companies. The objective is to know the opinion of these stakeholders on key aspects of the LIFE LEACHLESS project. The participation of these entities is essential to achieve the goals set.

The next...

Next June, Athens will receive the representatives of the LIFE LEACHLESS who will present the project in the framework of the "5th International Conference on Sustainable Solid Waste Management" on 21-24.

The LIFE LEACHLESS project will be presented next July to those attending the "ICEPCP 2017: 19th International Conference on Environmental Pollution Control and Prevention", which will take place in Venice on 20-21.

In the coming months, laboratory tests to optimise the operating conditions of the solar evaporation-condensation and direct osmosis stages will be completed. These are the technological basis of the LEACHLESS model.
