leachless

Water is LIFE...

www.lifeleachless.eu

Up to now...

Laboratory tests to optimize the operating conditions of the technologies that will be incorporated into the future **LEACHLESS** demonstration plant: evaporation / condensation module and direct osmosis module have been completed.

The experimental results have enabled successfully adjust design parameters.

During this time, the networking and dissemination activity has been intense, with participation in national and international events, preparation of workshops for children and publication of several papers and articles on the **LIFE LEACHLESS** topic.

Next...

In the coming months, it is planned to start with the study of energy integration for the equipment that compose the demonstration plant in order to include in the design of the pilot parameters of energy saving and sustainability.

The **LIFE LEACHLESS** project will be presented on 25th and 26th October at the 16th Conference on controlled landfills organized in Lérida by the association ATEGRUS, a member of ISWA.

Participate in the project as an observer! If you represent a facility where leachate is generated or a ceramic company, **LIFE LEACHLESS** invites you to participate as an observer in the different stages of the project. For this you only have to complete the questionnaire that appears on our website: www.lifeleachless.eu
