Up to now...

The **Project Demonstration Plant** faces the final straight of the assembly and installation stage.

The technology proposed by the **LIFE LEACHLESS** project aroused great interest as a leachate treatment technology among those attending the **International Water Fair (CUBAGUA 2019)** was held in **Havana** (Cuba) during **March**.

In April, students from the **University of Salamanca** got to know first hand the work carried out in the LIFE LEACHLESS project, during a visit to the Cartif's facilities.

Researchers from the LIFE LEACHLESS project were present at the **7th International Congress on Sustainable Solid Waste Management (HERAKLION 2019)** which took place between 26 and 29 June on the island of **Crete** (Greece). During the event they were able to network with other projects such as LIFE YEAST.

Next...

In the coming months the **demonstration plant** of the Project will begin with the operation step in Spain (**Lanzarote**).

The dissemination actions of the Project continue in the coming months. In October, the first experimental results obtained will be presented during the **International Congress on Waste Management (World Congress ISWA 2019)** that will take place in Bilbao (Spain).

If you are a **follower** we need you! If you represent an installation where leachate is generated or a ceramic company, **LIFE LEACHLESS** invites you to participate as observer in the different steps of the project. Please fill in the questionnaire that appears on our website [www.lifeleachless.eu](http://www.lifeleachless.eu).

**WE  
NEED  
YOU!**
