Up to now...

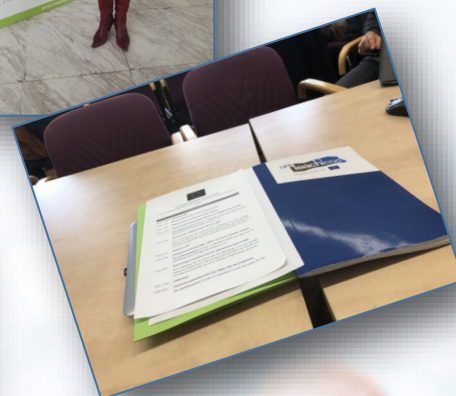

The assembly and installation of the **evaporation/condensation** step of the project's demonstration plant continues.

The **LIFE LEACHLESS** project attended and participated in the **14th edition of the National Congress on the Environment (Conama 2018)** which was held from **26 to 29 November** in **Madrid**. A reference event at an environmental level with more than 7,000 attendees.

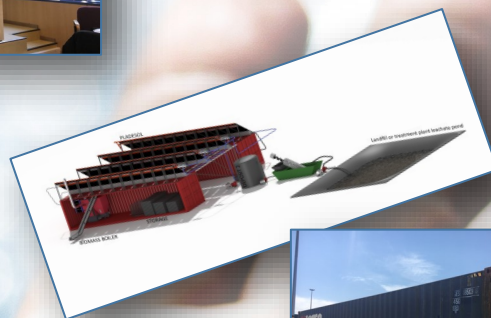

The **LIFE LEACHLESS** project was presented in a new framework of specialists in environmental technology. The project made known its solution to the problem of leachate treatment taking advantage of the meeting to launch the European H2020 **NUTRI2CYCLE** project. This meeting took place on **22 and 23 November** in **Ghent** (Belgium).

Next...

In the following months we will continue to carry out the **assembly** of the **evaporation/condensation** part and the **installation** of the demonstration plant.

The **LIFE LEACHLESS** project continues to make itself known with its dissemination and networking actions throughout the world. This time it is the turn of the **International Water Fair (CUBAGUA 2019)** to be held in **Havana** (Cuba) during **March** and the **7th International Conference on Sustainable Solid Waste Management (HERAKLION 2019)** to be held on the island of **Crete** (Greece) in **June**.

And we still want to meet more followers! If you represent an installation where leachate is generated or a ceramic company, **LIFE LEACHLESS** invites you to participate as an observer in the different stages of the project. To do so, all you have to do is complete the questionnaire that appears on our website [www.lifeleachless.eu](http://www.lifeleachless.eu).
